EDUCATION

University of Guelph

Master of Science, Computer Science — GPA 4.0/4.0

Canada, ON

Jan 2025 - Aug 2026

University of Guelph

Bachelor of Computing, Computer Science — GPA 4.0/4.0

Canada, ON

Sep 2020 - Jan 2025

SKILLS

Languages: Swift, Python, Go, Java, C, JavaScript, SQL

iOS Frameworks & Tools: SwiftUI, UIKit, SwiftData, Combine, StoreKit 2, RealityKit, XCTest, Swift Testing, Xcode, Swift Package Manager, CocoaPods, Fastlane, TestFlight, App Store Connect, Instruments

Web Frameworks: React, SvelteKit, Flask, Bootstrap

Backend & Cloud: Git, Firebase, MongoDB, Realm, AWS, Google Cloud, Docker, REST APIs, Tableau

Certifications: Google Data Analytics, Google Cybersecurity, Microsoft Azure Developer Associate

WORK EXPERIENCE

iOS Developer (Co-op)

TD Bank

Canada, ON

May 2023 - Sep 2023

Tech: Swift, SwiftUI, UIKit, CocoaPods, Jenkins, Git, Figma

- Delivered SwiftUI and UIKit features for a production iOS banking app, implementing screens against Figma designs and integrating with internal REST APIs
- Collaborated with designers and backend engineers on a cross-functional Agile team, participating in code reviews and Git-based PR workflows on a large iOS codebase
- Debugged and resolved UI and business-logic defects under tight sprint deadlines, prioritizing tickets to maintain release stability and code quality

iOS Developer (Part-Time)

Reality Experience Technologies

USA, OH

Feb 2022 - Jul 2022

Tech: Swift, SwiftUI, UIKit, Swift Package Manager, RealityKit, AWS, Firebase, MongoDB

- Automated data transfer from AWS S3 buckets to Firestore for the iOS app's approval pipeline, increasing throughput by 25%
- Enhanced the UX of the iOS application by engaging with users, collecting feedback, and shipping new features driven by their suggestions
- Rebuilt key screens in SwiftUI with an MVVM architecture and integrated RealityKit AR previews, working from Figma prototypes through to production

Quality Engineer (Co-op)

TD Bank

Canada, ON

May 2022 - Aug 2022

Tech: Microsoft Azure, MySQL, CI/CD, Datadog, Jenkins

- Implemented automation pipelines using Microsoft Azure, significantly reducing the team's downtime by 30% through the elimination of manual testing for data entities
- Executed automated test plans and scripts, uncovering and documenting software bugs to facilitate timely resolutions and ensure high-quality software releases

PROJECTS

github.com/Raein

Muros – iOS Wallpaper App

apps.apple.com/ca/app/muros/id6764196236

Tech: SwiftUI, Swift 6, async/await, StoreKit 2, SwiftData, MVVM, Fastlane

- Designed and shipped a production iOS app to the App Store, built end-to-end in SwiftUI with the @Observable framework and structured concurrency (async/await, TaskGroup)
- Implemented a full StoreKit 2 subscription system (monthly, yearly, lifetime) with free-tier limits, trial periods, and transaction verification; integrated TelemetryDeck analytics across 23+ event signals
- Architected an MVVM codebase with a feature-first module structure, SwiftData-backed search history, Keychain credential storage, and Swift Testing contract tests covering the backend API surface
- Automated release with Fastlane (TestFlight beta and App Store lanes) and GitHub Actions running `xcodebuild test` on every push to main

GMC – Course Seat-Alert Tool for the University of Guelph

Tech: Go, Firebase, MongoDB, Docker, GCP, YAML

- Built a web tool that monitors enrollment and notifies students in real time when a seat opens in a full class, letting them register before the waitlist reacts
- Used Go concurrency (goroutines, channels) to cut server response time by 60%; shipped via a CI/CD pipeline that tests, dockerizes, and deploys to Docker Hub and Google Cloud Run
